## End-to-End Integrated Services for Complete Point-of-Use IVD Devices

### Assay Development

From concept to commercialization, DCN Dx helps clients develop every aspect of today's high-performance point-of-use in vitro diagnostics.

## Platform Solutions

Modern rapid point-of-use testing requires high-performance sample collection devices, cartridges, and reader systems. DCN Dx delivers them.

## Contract Manufacturing

Whether it's a few thousand units or a few million, DCN Dx's flexible, scalable solutions for manufacturing ensure your needs are met when you need it.

## Clinical Research Services

DCN Dx develops and executes comprehensive evidence plans that are fully integrated with your assay's design and commercialization strategy.

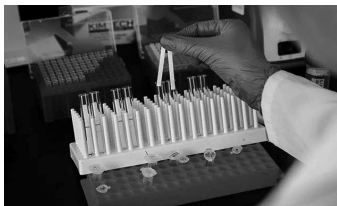

## DCN Dx empowers the creation of in vitro diagnostic tests that:

- Enable individuals to monitor their own health
- Help health organizations identify outbreaks of infectious disease
- Facilitate faster delivery of life-saving drugs
- Keep soldiers healthy
- Increase food production without harmful chemicals
- And more
