## Sekisui Diagnostics, Qualigen partnership, 10/16

in Marketplace Directory

Create PDF

**October 2016**—Sekisui Diagnostics and Qualigen announced a strategic partnership encompassing current business and future collaboration opportunities. Sekisui Diagnostics has assumed commercial activities and distribution management for the FastPack IP System and associated products in U.S. and international markets. The FastPack IP System is a point-of-care immunoassay system designed to enable physician office laboratories to offer key quantitative test results where there is immediate clinical value. The test menu includes vitamin D, testosterone, TSH, free T4, PSA, and hCG.

you need but you can't find on the market. LEA

**HAVE A PATHOLOGY-RELATED QUESTION?**

Do you have a question related to pathology an  
medicine practice? If so, and if it is likely to be  
others in laboratories, send it to CAP TODAY's C  
(srice@cap.org) or complete our online form. V  
experts for a reply. If the question and answer  
the column, the only name published will be the  
who answered the question.
